

NextTemp[®]

Clinical Thermometers

ORAL • AXILLARY • RECTAL / SINGLE-USE & REUSABLE

Clinical Accuracy

Helps to Prevent Cross-Infection

Resets Automatically

No Special Storage Requirements

Five-Year Life

Convenient

Latex-Free

Non-Toxic

Economical

Environmentally Friendly

Carries FDA & CE Certifications

Hospitals, Clinics

Physicians' Offices

Blood Donor Centers

Dialysis Centers

Safety & First Aids Kits

Emergency Preparedness Kits

School Health Centers

Government Health & Safety Agencies

NexTemp® TraxIt®

Since 1988, Medical Indicators (MI) has specialized in the manufacture of single-use and reusable clinical thermometers under the trade names of NexTemp and TraxIt. Our products are simple to use, accurate and economical. They meet or exceed the temperature measurement requirements of major clinical institutions.

MI's products are FDA registered, Class I medical devices and conform to the following requirements:

- FDA registration #2246308
- EC certificate (certificate # CE 01943) / CE mark 0086
- US Patents #5,676,465, #6,257,759, #6,284,078 & #6,491,774
- Conforms to ASTM E 1299-96 (2002) requirements
- Conforms to EN12470-2: 2001 requirements
- NAICS 339112

MI's thermometry products employ "Precision Phase-Change" (PPC) technology, which is accurate to $\pm 0.2^\circ\text{F}$ / $\pm 0.1^\circ\text{C}$ (within the critical range of 98.0°F to 102.0°F (37.0°C to 39.0°C)). The thermometers are thin plastic strips of material with an encapsulated matrix of harmless, non-toxic chemical dots at one end. Each dot in the matrix represents a specific temperature. The temperature dots cover a range of 96.0°F to 104.8°F (35.5°C to 40.4°C). The dots are a bright green color at normal room temperature. However, when the thermometer is placed in the mouth, the dots turn black in sequence. Each dot in the matrix turns from green to black as its own specific chemical temperature point is met. After the thermometer is removed from the mouth, the last black dot is read to determine the subject's actual temperature. The chemical dots will revert back to their original green state in a short period of time, so the unit can be reused (if reusable), or shipped in extreme hot or cold temperatures without damage.

THE NEXTEMP ADVANTAGE

- Accuracy: $\pm 0.2^\circ\text{F}$ / $\pm 0.1^\circ\text{C}$
(within the critical range of 98.0°F to 102.0°F / 37.0°C to 39.0°C).
- Shelf life: 5 years from the date of manufacture.
- Safe, non-toxic, environmentally friendly, latex-free.
- Economical: No probe covers, batteries, calibration checks, capital equipment.
- Storage conditions: No special conditions required. Resets automatically if exposed to elevated temperatures during shipment or storage. Best if stored in a cool dry place (86°F / 30°C or below).
- Reduces the risk of cross-infection or reinfection. "Throw away the germs."
- Easily transportable, unbreakable, inexpensive, convenient.

HOW TO USE NEXTEMP & READ THE TEMPERATURE

The last dot to turn black indicates the correct temperature. The thermometer will reset itself after approximately 20-30 seconds. Normal oral and axillary temperatures are between 97°F and 99°F (36.1°C and 37.2°C).

Place in "heat pocket" under the tongue

Last black dot shows 98.6°F

Last black dot shows 37.2°C

NEXTEMP STANDARD – Clinical Oral Thermometer

- Convenient, single-use device.
- Accuracy is $\pm 0.2^\circ\text{F}$ / $\pm 0.1^\circ\text{C}$ within the critical range of 98.0°F to 102.0°F (37°C to 39°C).
- Oral readings after 1 minute.
- Read last black dot (highest temp. point) to determine correct temperature.
- Shelf life is 5 years from the date of manufacture.
- No special storage requirements. Best if stored in a cool, dry place (at or below 86°F / 30°C).
- Safe, non-toxic & environmentally friendly.

ORDERING INFORMATION

1112-20 °F (2,000 Units, Packed in 20 Clinical Boxes of 100)
2112-20 °C (2,000 Units, Packed in 20 Clinical Boxes of 100)

TRAXIT WEARABLE THERMOMETER

- Enables continuous temperature readings for up to 48 hours.
- Applies with a gentle medical tape backing.
- Ideal for monitoring children's temperatures.

ORDERING INFORMATION

1313-20 °F (2,000 Units, Packed in 20 Clinical Boxes of 100)
2313-20 °C (2,000 Units, Packed in 20 Clinical Boxes of 100) } *Half cases available*

NEXTEMP ULTRA – Clinical Oral Thermometer

- Our latest development! The temperature signal retention time is extended to 1 minute.
- Accuracy is $\pm 0.2^\circ\text{F}$ / $\pm 0.1^\circ\text{C}$ within the critical range of 98.0°F to 102.0°F (37°C to 39°C).
- Oral readings after 1 minute.

NexTemp Ultra has all the same benefits as our standard product with IMPROVED READABILITY.

ORDERING INFORMATION

8000-20 °F (2,000 Units, Packed in 20 Clinical Boxes of 100)
8200-20 °C (2,000 Units, Packed in 20 Clinical Boxes of 100)

NEXTEMP REUSABLE THERMOMETER in Carrying Card

- Same great NexTemp thermometer, but designed specifically for reuse.
- Cleans with an alcohol swab, or warm soapy water. Reuse with same person only.
- Choose from one of our standard card formats (in stock), or **custom design** your own card (1,500 cards minimum). See our web site for details.

NEXTEMP PLUS – Rectal Thermometer with Sheath

- NexTemp standard clinical thermometer with specially designed rectal sheath.
- NexTemp Plus includes thermometer and sheath.
- **ORDERING INFORMATION**
1117-20 °F (2,000 Units, Packed in 20 Clinical Boxes of 100)
2117-20 °C (2,000 Units, Packed in 20 Clinical Boxes of 100)
